On-time delivery: Consistently delivered projects ahead of schedule.

PROJECTS

Neat 

01/2024 – 05/2024

Business Task Organizer (Freelance)

Allows HR to assign tasks with status updates ("To Do," "In Progress," "Completed"). **Attachments & Chat:** HR can attach files, and users can communicate via built-in chat. **Performance Tracking:** Monitors tasks completed before/after deadlines. **UI Modes:** Supports light and dark modes. **Versions:** Includes versions for regular users and admins. **Tech Stack:** Utilized Cubit state management, Shared Preferences, and Firebase integration.

Winko 

05/2024 – 07/2024

Social media platform (Freelance)

Video Sharing: Includes core features similar to TikTok. **Golden Screen:** Special page where content requires admin approval before posting. **Coin System:** Users can send coins to creators for videos they like. **Ratings Page:** Each video has a dedicated ratings section. **Donations & Earnings:** Features for donations and withdrawing earnings. **Tech Stack:** Used Cubit state management and integrated with API.

سوق ظفار 

08/2024 – 09/2024

Used Goods Marketplace (Freelance)

Zafar is a marketplace application designed for exchanging used goods. It allows users to list, browse, and trade items easily. The app leverages **Cubit state management** for efficient state control, **Shared Preferences** for local data storage, and integrates seamlessly with an **API** for backend communication, ensuring a smooth user experience.

bloody 

05/2024 – 06/2024

E-Blood Bank Exchange Market (Freelance)

Bloody is an app that allows users to schedule hospital appointments for purchasing blood bags.

- **Hospital Version:** Hospitals can announce availability for donations or sales.
- **Donor Version:** Donors can check donation status and specify the number of bags and blood type.
- **User Version:** Regular users can book appointments, which are synced with the hospital's schedule. The app utilizes **Cubit state management** and integrates with **Firebase** for seamless functionality.

SKILLS

- Rest Api
- Firebase Integration
- Bloc , Cubit
- MVVM
