SUMMARY

Motivated and detail-oriented Flutter Developer with a strong understanding of Rest APIs, Firebase, BloC State Management, Local Database. Passionate about creating seamless and efficient mobile applications. Seeking an opportunity to apply theoretical knowledge and gain practical experience in a challenging Flutter Developer role.

EXPERIENCE

Flutter Developer As A freelancer

Jan 2024 - now

Developed multiple mobile applications: Worked on various projects, showcasing my ability to handle different aspects of app development. API and Firebase Integration: Experienced in integrating and managing APIs and using Firebase as a backend service. Collaboration with Designers: Worked closely with UI and UX designers to create intuitive and visually appealing applications. Timely Delivery: Consistently delivered projects before deadlines, demonstrating strong time management and reliability. High Client Satisfaction: Due to my expertise and efficiency, clients often requested me to develop additional applications.

Used Cubit state management and integrated with API from php laravel.

Egyptians Booking System

self implementation • November 2023 - November 2023

Developed a comprehensive tourism application designed to enhance the travel experience for tourists visiting Egypt. The application offers the following features:
Explore Destinations: Tourists can browse and explore a wide range of tourist destinations across Egypt, with detailed information and images.
Accommodation Booking: Users can book accommodations from a diverse list of hotels, resorts, and other lodging options.
Predefined Travel Plans: Offers carefully curated travel plans that include popular tourist spots, activities, and itineraries, tailored to different interests and budgets.
Customizable Itineraries: Allows tourists to create and customize their own travel plans, providing flexibility to explore Egypt at their own pace and preference.
User-Friendly Interface: Designed with an intuitive and easy-to-navigate interface to ensure a seamless user experience.
Integration with Local Services: Includes recommendations for local restaurants, entertainment, and other services to enhance the overall travel experience.
